

Being Trauma & Healing Informed Training

Historical and inter-generational trauma leaves a lasting mark on tribal and urban communities, perpetuating destructive cycles. This training delves into understanding trauma's impact on the brain and behavior, unraveling its manifestations in workplaces and communities. It guides participants in addressing trauma and fostering healing within their communities. The program also explores how policies and services in programs can be trauma and healing-informed, ushering in a transformative approach.

"Where there is Trauma, Healing is the Answer"

**December 10, 2024
9:00 am - 12:00 pm**
